

TIME LIMITS

ECC has no general time limit on the use of credits; except as defined by external accrediting organizations, such as the 5 year limitation of BIO 121 and 122 for Nursing (2104) majors. Accordingly, any credits ever completed by students at ECC are still potentially valid, even if only as electives. Faculty of respective degree or certificate programs may propose certain program specific conditions, which will be considered by appropriate shared governance committees and subsequent administrative review before implementation. Therefore, any courses that are no longer offered, nor contained in the catalog in effect at time of readmission and/or matriculation, are still potentially available to satisfy program requirements.
